

The enclosed proposed amendments seek to eliminate this discrepancy by defining microcavity as having a single wavelength dimension rather than half wavelength dimension.

Also, as a part of the RCE process, it is proposed to include two new claims, which were part of the original PCT publication, but were removed to keep total number of claims below 20. These claims expand on the feature of the microcavity, which is now part of Claim 1, and are fully supported by paragraph 0023 of the specification (as amended).

Please do not hesitate to contact the undersigned if further information/action is required.

Sincerely,

A handwritten signature in black ink, appearing to read 'Michael Bazylenko', with a stylized flourish at the end.

Michael Bazylenko, PhD
